

DEATH BY AUDIO®

INTERSTELLAR OVERDRIVER

OPERATION MANUAL

INTERSTELLAR OVERDRIVER

CONTROLS:

Welcome to the galaxy of bone-crushing overdrive. The *Interstellar Overdriver* is an explosively loud overdrive with a lot of bite. The Overdrive knob adjusts the gain and the Master knob adjusts the output volume. The more you turn the Overdriver up, the more blissful overdrive comes out. Not to be confused with a mellow screamer.

POWER:

Operates on a standard 9V DC power supply (2.1mm, center-negative). We recommend Death By Audio's **RAW POWER** power supply for optimal performance. The pedal draws 1 mA of current when engaged.

**ALL PEDALS ARE
HANDMADE BY
MUSICIANS, FOR
MUSICIANS IN
NEW YORK.**
